

Personal Stairclimber: Track

SAFE ON THE STAIRS. EASY TO USE.

The PS Track stairclimber is a unit that has been developed for transport on straight steps. Using the tracked stairclimber increases freedom of movement for people with walking difficulties. At the same time, it is ergonomically designed to relieve stress to the back of the person operating the tracked stairclimber.

The extremely lightweight PS Track stairclimber is impressively easy to use, has three speeds, acoustic and visual inclination warning as well as a range of up to 1000 steps on a single battery charge. It's so easy - simply release two levers to dismantle the PS Track into two easily portable parts. The PS Track ensures safe handling on the stairs. There are two versions of the PS Track available.

POWERED TRACKED STAIRCLIMBER FOR UNIVERSAL WHEELCHAIRS

The PS Track is the compact basic version that enables universal wheelchairs to be transported up and downstairs conveniently and safely.

POWERED TRACKED STAIRCLIMBER FOR LIGHTWEIGHT ELECTRIC WHEELCHAIRS

The PS Track Long is the longer version (+132 mm) of the PS Track stairclimber, which is available as an option with factory-fitted drive-on ramps for transporting lightweight electric wheelchairs.
