## SAL HD STAIRCLIMBERS

UNI | FOLD | DOLLY

From heavy boilers and white goods to bulky rolls of flooring, the **SAL HD** can transport heavy loads quickly and safely up and down stairs. With one person doing what was once a job for 2 or 3 people, eliminating back problems and joint pain and substantially reducing any risk of accident, the **SAL HD** is a versatile and profitable addition to your business.

This ingenious machine is ideal for use in transport and logistics companies, retail, trade and industry. The **SAL HD** offers the highest degree of protection for the goods you are shifting and most particularly for the health and welfare of your employees. The heart of the **SAL HD** is the perfectly balanced climbing unit with two speed settings and single-step and continuous-step modes. The step edge brake system guarantees the highest level of safety.

There are 3 models in the **SAL HD** range to choose from:

- **SAL HD Uni** (non fold-up handle) for compact heavy loads such as copiers and safes.
- **SAL HD Fold** (fold-up handle) for heavy loads such as drink machines and stacks of heavy boxes.
- **SAL HD Dolly** for transport routes with lengthy stretches on the level.

### Innovative & Practical...all the advantages at a glance

- Modular lightweight construction
- Rugged frame with patented aluminium profiles
- -three box sections for additional strength
- Perfectly balanced climbing unit for safe operation on steps and stairs
- Innovative, integrated step edge braking system situated inside the rims of the main wheels.
- Automatic shut off mode
- Fixed, high-strength aluminium toe plate
- Ergonomic hand grips with non-slip rubber
- Steps heights up to 22cm
- Two climbing speeds
- Up/down switch on both sides for left-and right-handed operators
- Intelligent electronics for safe operation in all transport situations
- Puncture-proof tyres
- Soft coated long wings available for safe carriage of broad loads
- Optional toe plate extension with 4 swivel castors for easy movement on level ground
- 24V quick-charge battery unit

## SAL HD STAIRCLIMBERS

UNI | FOLD | DOLLY

### SAL HD Universal - Economical and Safe!

The SAL HD Uni has been designed to transport high and heavy loads over every kind of stairs.

Vending machines, gaming machines, drinks dispensers, large boilers, solar heating vessels, stacks of crates, heavy rolls of flooring, telecommunication cabs, office and sports equipment. What once more a difficult balancing act can now be managed effortlessly by the SAL HD Uni with its powerful motor.

Ergonomic fixed handles, designed for tall and heavy loads. Thanks to its sleek design and innovative climbing technology, high and heavy objects can be transported safely and easily up and down narrow staircases and even spiral stairs.

### SAL HD Fold - Quick and Clever!

The SAL HD Fold is ideal for transporting compact, heavy goods, such as photocopiers, safes, boilers, air conditioning unit, vending machines, office equipment, telecommunications cabinets, cast-iron stoves, linen trucks, lift motors and batteries for telephone systems.

**Foldable handle for improved centre of gravity.** If the object has a very low centre of gravity then you need to crouch down to hold your balance, putting the strain on your back. But with the SAL HD Fold, you can set the inclination of the handles to the exact centre of gravity of the goods being transported. This means you can maintain upright posture.

By releasing the clamping lever on the handle bar frame, you can set the ideal position of the hand grips in seconds. Friction plates ensure they remain securely in place when the clamping lever is tightened. Folding down to 1195mm for transport and/ or storage.

### SAL HD Dolly - Safe and Speedy!

With the SAL HD Dolly you can increase your speed on the flat as well. Simply lift the SAL HD, extend the Dolly and lock it into place. Transform in seconds from climbing stairs to rolling along on the level ground.

With its support wheels extended, it is unbeatable on level ground. You can also use the Dolly system to transport high loads through standard doorways.

The Dolly version is available for both the Universal and Fold Models.
