Making Light Work Of Heavy Loads

The Handtruck Stairclimbing Range can lift either 315kg or 540kg (depending on the model listed below) and can climb stairs at a rate of 10 to 18 steps per minute.

Handtruck Stairclimbers are constructed of a tough tempered aluminium alloy making the hand trucks stronger than magnesium but lighter than steel. All of the Handtruck Stairclimbers are 610mm wide and range in size from 1520mm to 1830mm tall.

The Handtruck Stairclimbing Range comes complete with 12 volt, 17 amp hr sealed gel battery, automatic battery charger and one 3.6 metre retractable load securing strap (RW-1).

Forklift

The Stairclimbing Forklift can lift 540kg off the back of a truck or van, and can also carry this weight up stairs.

Hercules Stairclimbing Forklifts have side frames made from tough tempered aluminium as well as steel lifting frames with 70cm long forks for raising loads up to 137cm, high enough to load or unload a semi trailer.

The Stairclimbing Forklift comes with either manual hand crank or electric winch. This range comes complete with 12 volt, 17 amp hr sealed gel battery, automatic battery charger and one 3.6 metre retractable load securing strap (RW-1).
